

HITCHHIKER
LUXURY 5TH WHEELS

Champagne

38 LKTG

Champagne luxury...elegance...beauty

These are words that describe the Champagne Edition and most other high end 5th wheel brands. But as the saying goes, "beauty is more than skin deep". The fact is there are less than eight high end 5th wheel brands that truly understand the needs and expectations of full time RV'ers. Some would say that you could actually count them on one hand. NuWa is one of these brands, and continues to prove to customers why it might be the best value of all, even though it is not inexpensive. What sets NuWa apart is the "intangible" and difficult to

see features that make a difference in the user's RV experience.

NuWa is the most experienced 5th wheel manufacturer, and pioneered a number of innovations in the fifth wheel product including the first glide room concept. The "design by detail" philosophy is NuWa's constant corporate challenge to produce superior livability and reliability. Consider the new 36 LK RSB model with more closet storage than any 5th wheel on the market. Have you ever seen such

a spacious bath and so many drawers throughout? The functional usefulness of the new entertainment center and the residential feel of the living room area? Other innovative floorplans are equally superior, but it's even more than livability; it's also the reputation for durability and reliability proven by years of product refinement. NuWa is famous for its close relationship with customers. The "open ears" attitude and a goal of optimizing reliability has truly created an exceptional fulltimer trailer.

One of the most important intangible values that can be provided is exceptional customer service. NuWa is famous among RV'ers for its consumer factory service support and response to customer requests for assistance and information. Evidence of the statements can be best seen by visiting www.nuwa.com, known as one of the most informational and valuable manufacturer web sites. Another valuable tool for potential Champagne owners is www.nuwaowners.org, where owners discuss their experiences,

answer questions and offer suggestions about features, maintenance tips, hitches and tow vehicles. Visiting these two sites or taking the factory tour, via video or at the plant in Chanute, Kansas, typically causes customers to realize just how different NuWa is. The Champagne is beautiful and elegant. That's the easy part; it's the intangible features that make the real difference of a satisfied customer.
